

DRUMTAPE Indicators Fit Standard Drums

Designed specifically for use in 55 or 30 gallon drums. Drums may be in horizontal or vertical position. DRUMTAPE Indicators, available in brass, stainless steel or PVC, are ideal for liquids such as chemicals, lube oils, fuels, etc. May also be used in pressure vessels or in hazardous liquid storage drums or tanks since operation does not open or disturb the vessel. If liquid is excessively contaminated, an occasional wipe-down is the only maintenance required.
